

66263 CROSS FIRE Crossfire Insert Spreader

Better By Design And Backed By A 5-Year Warranty

The Crossfire was designed with extensive input from experienced end users looking for a better insert spreader. Each model has been designed to be easier to use, easier to maintain and easier on your vehicle. The Crossfire Deluxe was designed with an integrated pre-wet system.

We designed the Crossfire to be easy and simple to maintain while providing years of trouble-free use. Some of the key built-to-last features found in the Crossfire line includes:

- Polyethylene hopper provides years of service and will not rust or corrode.
- Heavy-duty 1/2-horsepower auger motor grinds through tough chunks providing an even material flow to the auger.
- Low friction poly auger bearing requires no lubrication or maintenance.
- Auger assembly can quickly be removed for inspection or maintenance.
- The spinner assembly can be removed making it easy to offload material at the end of a long shift.

Pre-wetting the material speeds up the melting process and reduces how far the granules bounce once they hit the pavement. Pre-wetting can save up to 30% in material usage.

Being out on the road in the snow and ice makes for a long night. That's why we made many of the ease-of-use features that are options on competitive spreaders standard on the Crossfire.

Type	Insert hopper with pre-wet	Empty Weight	795 lbs
Vehicle	3/4-ton pickup trucks	Max Capacity Load	1.5 cu yd
Length	6-feet or 8-feet	Max Capacity Weight	4050 lbs

Capacity	1.5 or 2.0 cubic yards	Spreading Material	Salt/Calcium Chloride
Materials	Dry, free-flowing rock salt	Warranty	5
Construction	Polyethylene	Hopper Material	Poly
Part #:	66263	Spinner Diameter	13"
Hopper Width	70"	Spinner Material	Poly
Hopper Depth	92"	Tire Diameter	
Total Height	53"	Frame Material	
Spread Width (min-max)	4' - 30'
